

TOPMAX-8GANG

Multi programmeur pour 8 composants à la fois, supports ZIF32

Le TOPMAX-8GANG est un programmeur de production permettant de programmer 8 composants en même temps parmi les EPROMs, les EEPROMs parallèles, les mémoires FLASHs, les PLDs et les microcontrôleurs. Au total plus de 1800 composants peuvent être supportés. Le TOPMAX-8GANG se connecte sur le port parallèle de tout compatible PC et fonctionne avec un logiciel sous Windows 95/98/ME/NT/2000/XP. La copie des composants peut s'effectuer à partir d'un composant source à placer sur le premier support ou bien à partir d'un fichier sur disque dur. Pour programmer vos composants vous devez utiliser la base du programmeur sur lequel on enfiche un adaptateur interchangeable équipé des 8 supports tel que par exemple le TM-8G-DP (support 8 x ZIF32 permettant à lui seul de programmer les EPROMs et Mémoires FLASHs en boîtier DIP24, DIP28 ou DIP32). Grâce à l'adaptateur TM-A48 il est également possible de transformer ce programmeur de production en programmeur universel équipé d'un support ZIF48 et supportant alors plus de 4600 références de composants.

Exemple d'ajout de 8 supports ADA-TSOP32-20 sur un support TM-8G-DP pour programmer les mémoires FLASH en boîtiers TSOP32 (8x20mm).

Comprend :

- Une base programmeur auquel il faut adjoindre l'adaptateur de votre choix.
- Un cordon d'alimentation CEE.
- Un câble port parallèle.
- Logiciels sur disquettes 3 1/2, (DOS et Windows 95/98/NT/2000/ME/XP).
- Un mode d'emploi en Français et en Anglais.
